## DETAILED ACTION

### *Election*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

1. Claim 3 wherein the organism is *Listeria monocytogenes*
2. Claim 5 wherein the organism is *E.coli*.

If electing species 2 please elect one set of primers from SEQ ID NOs 1 and 2 or 7 and 8.

3. Claim 7 wherein the organism is *Salmonella* spp.

If electing species 3 please elect one set of primers from SEQ ID NOs 3 and 4 or 9 and 10.

4. Please elect one set of primers from SEQ ID NOs 1 to 6 from claim 16.
5. Please elect one set of primers from SEQ ID NOs 5 to 10 from claim 17.

The following claim(s) are generic: 1

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical

features for the following reasons: Because they are drawn to physically and structurally distinct products organism and SEQ ID NOS.
